

Strategic planning training

Germany 23/5-3/6/2011

Evaluation for Friedrich Naumann Foundation

Dear Rana,

First thank you for your invitation, many thanks for your Organization FNF, and many thanks for your efforts.

The training in words:

First, I would like to thank FNF for this training; it was really very useful and interesting. As being one of the trainees who attended Mr. Wolf & Dr. Gulf training, I would like to say that the training was very informative and it has contained many new techniques and sciences other than the strategic planning.

Dr. Gulf has a very interesting & unique way in presenting and discussing the topic where his way in linking the theory with reality has a great impact on the trainees and it's very inspiring. Also, the idea of including other sciences during the training helps the trainees to concentrate more on the topic where it takes them away of the training atmosphere and help them to gain new knowledge.

Being part of the program, with participants from different cultures we exchanged different experiences & exposed to many systems & political circumstances, got more knowledge, learned about different cases in the countries that have conflict and difficulties in political parties, and going through revolutions.

Improve knowledge and understanding of the international development programs.

Increase ability to work independently and contribute to a team

Improve knowledge of gender equality and youth & women's empowerment, Political issues

Again, many thanks for FNF and International Academy (IAF) and wish of both you all the best and success.

Regards,

Ebtesam Ahmad
